

How to use it (easy steps)

- Step 1: Type a place in Location. Example: Wilmington, NC.
- Step 2: Pick a Business Query from the menu.
- Step 3: Pick miles in Radius (how far to look).
- Step 4: Tap or click SEARCH.
- Step 5: Look at results. Click website or map if you want.
- Step 6: Click DOWNLOAD CSV if you want a file.

What each part does

- Location: tells the app where to search.
- Business Query: tells the app what kind of company to find.
- Radius: tells the app how far to search.
- Search button: starts the search.
- Get emails (optional): tries to find emails from websites. It can be slower.
- Preferred star: saves favorites so you can find them again.
- Trash icon: removes bad results for this search.
- Day/Night icon: changes light or dark look only.

Helpful tips

- If nothing shows up, try a bigger radius.
- Pick a parent category to search many child categories at once.
- Press Enter/Return on keyboard to run search.
- If app looks old, refresh page and reopen Open-App.command.
